PROFILE SUMMARY

Software engineer with a proven track record in a global investment-banking technology team, specializing in full-stack development, distributed systems, and large-scale data engineering. Experienced in managing platform systems that calculate counterparty credit risks. Currently pursuing postgraduate studies to deepen expertise in Artificial Intelligence, machine learning architectures, and predictive analytics.

EDUCATION

University of Technology Sydney (UTS)

Master of Artificial Intelligence | July 2026 – Present

Delhi Technological University (DTU)

Bachelor of Technology in Computer Engineering (GPA: 8.23) |
2019 – 2023

PROFESSIONAL EXPERIENCE

Macquarie Global Services • Senior Associate (L2 Software Engineer)

April 2025 – June 2026

- **Technical Leadership:** Recognised SME for the platform; resolved a portfolio of 245 critical tickets (defects, incidents) and authored 36+ internal Confluence pages.
- **Data Upgrades:** Led the technical execution of a division-wide data-model upgrade, orchestrating 8 deployment bundles across 100+ database tables.
- **Full-Stack SDE:** Logged 720+ commits to 6+ Spring Boot microservices and maintained a microfrontend ecosystem comprising 12 Angular microfrontends.
- **Professional Reference:** Karan Juneja (Manager and Credit Risk Tech Lead, Macquarie Group) | +61 412 036 110

Macquarie Global Services • Associate Engineer

Nov 2023 – March 2025

- Engineered enterprise RESTful Spring Boot APIs and Angular dashboards, enforcing 90%+ JUnit code coverage.
- Owned Bamboo CI/CD pipelines, application vulnerability checks (Fortify, Black Duck), and Cyberark certifications.

Macquarie Global Services • Full-Stack SDE Intern

Jan 2023 – Oct 2023

- Collaborated on Spring Boot financial modules and designed responsive Angular dashboards for credit-risk visualizations.

Airtel Payments Bank • Backend Engineering Intern

June 2022 – Aug 2022

- Engineered and optimized backend Java Spring Boot microservices for secure customer banking and payment routing API integrations.

Other Experiences

2017 – 2021

- **LIS (2021):** Deployed automated Python web-scraping scripts and cleaned datasets for NLP model training.
- **Rato Bangala Kitab (2018):** Directed multimedia poem recitals and managed design assets for online channels.
- **Sofos Softwares (2017):** Assist in frontend web development (HTML, CSS, JavaScript) for responsive pages.

SELECTED PROJECTS

Early Detection of Alzheimer's Disease via Speech Analysis [Deep Learning / NLP](#)

- Engineered a hybrid CNN + BiLSTM network with max-pooling to extract linguistic features from speech transcripts, achieving a state-of-the-art 92% accuracy and F1-macro of 0.92 for early-stage AD detection in Hindi.

Multimodal Transformer Adaptation [Computer Vision / Social Computing](#)

- Designed task-specific multimodal classifiers utilizing CLIP-ViT backbones specifically for text-embedded images, implementing a Co-Attention Ensemble model for Hate Speech detection (F1 score: 0.7929).

TECHNICAL SKILLS

Languages & Frameworks: Java (Spring Boot, Hibernate), Python, TypeScript, Angular, SQL (T-SQL, PL/SQL), Bash, Scala (Spark), HTML/CSS

Backend, Cloud & DBs: RESTful APIs, Kafka, Apache Spark, Airflow, AWS (RDS, S3, EKS), Docker, Bamboo CI/CD, SQL Server, Sybase, Postgres, MongoDB

ML & Observability: TensorFlow, PyTorch, HuggingFace, NLP, Computer Vision, scikit-learn, Grafana, Splunk, Postman

ACHIEVEMENTS & AWARDS

- **Google Cloud Certified:** Data Science & ML Track
- **Duke of Edinburgh:** Bronze Award Recipient (2017)
- **Gold Medalist:** Mahasangram Debate Competition (2017)
- **Global Rank 6:** International Mars Hackathon (2020)
- **Second Runner-Up:** Indian Rover Challenge (2019)
